

433-EXT Window/Door Exit Alarm Mounting Instructions

Step #1

Remove back cover and insert batteries (Included)

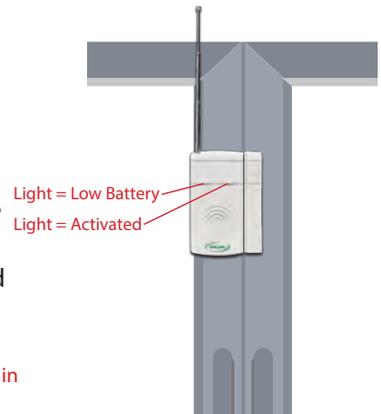

Step #2

Refer to instructions for your CMU or 433-EC for programming

Step #3

- The window/door must be closed when mounting to insure that both parts of the alarm are lined up next to each other.
- Using the double stick tape provided, mount large part with antenna to the window/door frame and the small part to the window/door.
- When the window/door opened, the two parts are separated from each other and trigger the alarm that you have it programmed to, notifying the caregiver.

*Large part of sensor with antenna must be on the left hand side when mounted in order to work correctly.
